

Gagan Sahu

Full Stack Web Developer

karanme390@gmail.com 9074681763 www.linkedin.com/in/gagan-sahu-0405a9354

PROFESSIONAL SUMMARY

Versatile Full Stack Web Developer proficient in JavaScript and the MERN stack, with hands-on experience in both frontend and backend development. Demonstrates strong capability in cloud deployment using AWS, as well as practical knowledge of database management with MongoDB, MySQL, and PostgreSQL. Skilled in workflow automation and IT service management, supported by ServiceNow certification and foundational exposure to SAP and Oracle ERP systems. Adept at problem-solving, debugging, and collaborating within dynamic development teams.

PROFESSIONAL EXPERIENCE

Web Developer at i-Connectresources International Pvt. Ltd.

April 2025 - Present

Bhilai, Chhattisgarh

As a Web Developer at i-Connectresources International Pvt. Ltd., I focused on enhancing front-end user interfaces and supporting seamless backend integration. I contributed to cloud deployment initiatives and IT workflow automation, prioritising performance optimisation and user experience improvements.

- Enhanced user interfaces using React.js and Tailwind CSS to deliver an improved user experience.
- Supported API development with Node.js and Express.js, facilitating robust backend integration.
- Assisted with AWS cloud deployment, contributing to secure and scalable hosting solutions.
- Contributed to ServiceNow IT workflow automation, streamlining internal processes.
- Focused on debugging and performance optimisation to ensure high-quality deliverables.

IT Intern at i-Connectresources International Pvt. Ltd.

February 2024 - April 2025

Bhilai, Chhattisgarh

During my tenure as an IT Intern at i-Connectresources International Pvt. Ltd., I developed practical skills in MERN Stack development, working across both front-end and back-end components. My experience included supporting cloud deployment and contributing to IT workflow automation projects.

- Enhanced user experience by designing and implementing front-end interfaces using React.js and Tailwind CSS.
- Supported backend integration by developing an understanding of API development with Node.js and Express.js.
- Assisted in deploying applications on AWS, learning secure and scalable cloud hosting practices.
- Contributed to automation of IT workflows in ServiceNow, streamlining organisational processes.
- Focused on debugging and performance optimisation to improve overall application usability.

KEY PROJECTS

VerityAI — Academic Integrity Platform

Role: Full-Stack Developer

A secure platform designed to scan and analyze student submissions for plagiarism, AI-generated text, and ghostwriting.

- Built responsive dashboards for both Student and Faculty portals using React.js, TypeScript, and Redux Toolkit.
- Engineered backend API endpoints and asynchronous pipeline tasks using Python, Django, Celery, and Redis.
- Integrated deep-learning stylometry models and vector databases (pgvector) to run hybrid semantic-keyword searches.
- Resolved API schema conflicts, containerized services using Docker, and optimized SQL search performance.

LearningOutcomeOS — K-12 Analytics Platform

Role: Full-Stack Developer

An enterprise school management and analytics portal to map curriculum standards and automate progress tracking.

- Developed analytical dashboards with Recharts, React 19, and Redux, supported by a Django REST Framework backend.
- Containerized frontend, backend, and MySQL database modules using Docker Compose to align local-dev with production.
- Debugged platform issues including Safari-compatible date parsers, state synchronization, and race conditions.
- Hardened endpoint security with Django rate-limiters, secure headers, and filtered file-upload validation rules.

Intelligent HR Management — ServiceNow Custom App

Role: ServiceNow Developer

Enterprise workspace custom app to automate HR, onboarding, leave tracking, and document lifecycle events.

- Designed automated catalog workflows and configured Service Portal pages using ServiceNow App Engine Studio.
- Connected workflow tasks with external API systems via Integration Hub spokes and custom REST integrations.

Oncology Healthcare Platform

Role: Frontend Developer

- Built responsive clinical screens using React.js to visualize patient timelines and critical oncology metrics.

- Standardized layout consistency for complex medical records to render clearly on mobile and desktop viewports.

Auction Product Dashboard

Role: Frontend Developer

- Created high-performance real-time bidding dashboards, resolving latency issues in state updates.
